

Spring is on the way!

We recommend using granular products and a spreader to follow the recommended rates on the packages. All the products listed you should be able to find at your local hardware store or something similar. It's important to read the directions on the back of the bag because applications may change from product to product and there are certain temperatures that need to be met and watering conditions.

Turf Grass

BERMUDA

fine to medium leaf texture, dark green, dense and low growing

ST. AUGUSTINE

light to medium green color, coarse leaf texture, creeping growth habit

ZOYSIA

leaf texture from fine to medium coarse - color ranges from light to medium green

Common Weeds

DANDELION

The leaves grow close to the lawn in a star-shaped pattern. Yellow flower. Grow in spring to early summer.

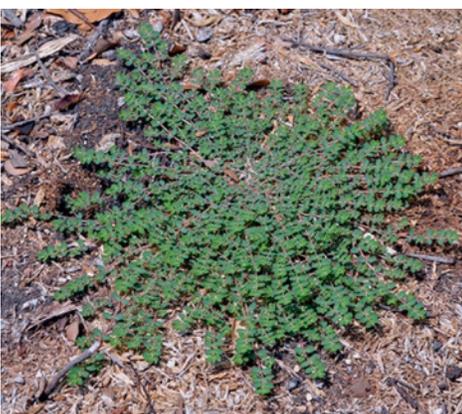

HENBIT

Winter annual that blooms in early spring with small purple flowers.

PURSLANE

Late spring or early summer. The succulent stems and leaves stay close to the ground.

SPURGE
